

Installing the Heiltsuk Keyboard for PC

PC keyboard layout installation procedure

1. Double click on "setup.exe" (This will be located in the Zip file in the folder entitled "heiltsuk"; it may just say "setup").
2. Follow the directions after clicking it and allow it to install.
3. A security message ("User Account Control") may activate (often located on your tool bar as a flashing gold and blue shield). Approve the installation.
3. Restart your computer.

*Your computer/tablet may not have to restart. Check the little keyboard icon to see if the keyboard is properly installed. It will say: "English (Canada): Heiltsuk Orthography – Custom Keyboard."

Using your new Heiltsuk PC keyboard

1. To switch keyboards from standard keyboard to Heiltsuk, select "Heiltsuk Orthography" or "English (Canada): Heiltsuk Orthography – Custom Keyboard" from the bottom right-hand corner of the screen or press the *Windows key + Space bar* to toggle between keyboards.

*You can move the icon around if it is more convenient for you.

2. View the images in the "Keyboard Images" folder for a view of added keys.

If you want to remove your Heiltsuk keyboard

1. Double click on "setup.exe" or equivalent.
2. Select the remove option.
3. A security message ("User Account Control") may activate (often located on your tool bar as a flashing gold and blue shield). Approve the removal.
